

Seafrigo, a new player in heavy package handling: reinforcement for HAROPA PORT's breakbulk offering

Seafrigo, a major player in international logistics,

has enriched its service offering in Le Havre by launching a new heavy package lift activity.

This means that by 2023 Seafrigo will have over 150 drivers assigned to port traction activities, including 50 also to be trained as drivers for cranes and specialized cargo handling machinery in breakbulk ship unloading and heavy lift operations.

This activity rounds out the service offering of [Seafrigo General Cargo](#), proposing a holistic global supply chain solution ranging from initial goods provenance to final destination.

A closer look at Seafrigo's heavy load activity

RoRo and LoLo heavy package lift

50 experienced crane drivers

Driving specialist machinery
SPMT, SPT, combi-Lift...

Driving mobile and shipboard cranes
with >750T capacity

► This new service offer enables HAROPA PORT to consolidate its position as a key player in logistics for industrial projects and exceptional package handling along the Seine Axis.

"The start-up of this new activity by Seafrigo, a major partner for HAROPA PORT, comes as further reinforcement of the acknowledged expertise of the professionals working in our ports in handling both conventional and outside cargoes."

Kris Danaradjou
Development Deputy CEO, HAROPA PORT

"Backed by the experience acquired by our teams over the last more than two years, we have set ourselves the goal of making HAROPA PORT a reputed, attractive and competitive provider for port heavy lift operations."

Louis Greverie
Deputy CEO, SEAFRIGO
