

My ETA now integrated into S)ONE: improve the planning of your logistics operations in Le Havre during global shipping disruptions

myETA

Find My ETA, easyport's solution for predicting goods arrivals in Le Havre, directly in S)ONE.

Estimated Time of Arrival (ETA) of ships in a port is a key element that determines port call times and conditions all transport and logistics flows. [My ETA](#) provides an ETA prediction, using Artificial Intelligence, by cross-referencing data from SOGET's Port Community System S)ONE and from HAROPA PORT.

Are you expecting goods in Le Havre?

Find out when the next logistical stages are scheduled in S)ONE tracing.

►► Thanks to enhanced goods traceability, My ETA helps to improve supply chain management by optimizing the organization of material and human resources, thus generating savings.

My ETA, a solution for predicting goods arrival times in Le Havre
