- Compare

My KPIs,
a web module created by
HAROPA PORT & SOGET

- tracks – step by step – the average turnaround times of your containers,
- and compares your times with the port average.

View your monthly container flow performance:

- **The logistical, administrative, commercial and customs stages in container processing:**
 - for imports: ship arrival - unloading - haulier identification - OK from customs - exit permit - physical exit from the handling terminal, etc.
 - for exports: container entry into the handling terminal - OK from customs - ship departure
- **Terminal entry/exit using all transport modes / road / rail / river**
- **Container volume figures: dry / reefer / hazardous**
- **Historical data recorded from 2014**

 **Reliable, secure data produced by SOGET's S)ONE Port Community System**

Try My KPIs yourself:

- **Your company's performance**
(enter your S)ONE code)

- **Average port performance**

DEMO You do not have an S)ONE code and want to learn more about customized KPIs?
 [Access the demonstration module](#)

Indicators definition has been made possible by a collaborative program commenced in 2011 involving all port actors.
